

ENVIRONMENTAL & SUSTAINABILITY POLICY

Committed to a sustainable, low-carbon future driving business growth

Our founder

Sustainable Business Services' vision is to be a leader in sustainable business. Our sustainable business services support, co-create and inspire our people, clients and stakeholders to develop sustainable, innovative business practices that drive collective impact and financial performance consistently.

James is a member of IEMA, a BSI and NQA Associate Consultant, specialising in ISO 14064 and PAS2060, and a Climate Reality Leader. James founded SBS to make a difference and to support businesses in realising a sustainable, low-carbon and cost-effective future.

James Staniforth – SBS Founder & Director

POLICY

The aim of the SBS environmental policy is to support the continued development of our business, whilst maintaining a high level of environmental performance and being seen as a leader in the field of sustainability.

We aim to make a significant positive impact on the environment, our people and local communities, whilst delivering positive environmental outcomes for our clients.

This policy covers all of Sustainable Business Services' business activities.

OUR APPROACH

We recognise that our business is connected to the environment we operate in, and that we have a responsibility to protect it.

We set high environmental standards across our business. This policy reflects our commitment to sustainability and to the well-being of the planet, and to setting an example that inspires positive change.

People first

Our environmental policy is rooted in our commitment to our people, recognising that a sustainable future is only achievable through collective effort. We invest in staff training and development, so every member of our team has the knowledge and skills to contribute to our environmental objectives.

We embrace diversity and inclusion, fostering a workplace where varied perspectives drive innovation for ecological stewardship. Our engagement extends beyond our staff to customers and supply chain partners, to enact positive change within the wider community. Our staff inductions set out our "why", the core reason behind our environmental work, building a shared sense of purpose from the very beginning of our time together.

Net-zero future

Our environmental policy is firmly committed to achieving a net-zero future, a goal we approach with determination and leadership. We are actively reducing carbon emissions in line with Science Based Targets.

A comprehensive measurement of the carbon footprint of all our business activities is underway, to ensure transparency and accountability in our progress.

We are dedicated to developing services that support both our staff and customers in their net-zero ambitions, recognising that collective action is essential for meaningful change.

2035

Target date to reach net-zero

03 Travel & waste

Travel

We prioritise virtual meetings, reducing unnecessary travel. We actively consider green transport alternatives and are committed to transitioning to electric vehicles at the end of the current vehicle lifecycle. We encourage participation in cycle-to-work and car-sharing schemes, promoting eco-friendly commuting among our team.

Waste

We follow the waste hierarchy at all times. First, we aim to reduce consumption and use, minimising waste at its source. Second, we prioritise reuse and recovery, extending the life cycle of resources. Third, recycling ensures materials are reprocessed and diverted from landfill.

Customer

Our environmental policy is rooted in our commitment to sustainability and education. We act as sustainability champions for our clients, actively promoting net-zero initiatives and integrating sustainable practices across all our business services and products.

We use the latest environmental technology to improve our customers' efficiency, supporting them on the path to a more sustainable future. Through continuous upskilling and education, we help our stakeholders make informed, sustainable decisions that contribute to our collective environmental goals.

Continual improvement

Our environmental policy is rooted in a commitment to continual improvement. We actively monitor and measure our performance against set objectives, ensuring we are always moving towards enhanced environmental stewardship. We review these objectives regularly to foster ongoing progress.

We also hold our suppliers and partners to the same high standards of environmental performance, recognising that collaboration is key to our collective sustainability efforts.

CONTACT US

We are a friendly, dedicated team ready to talk.

All our services are designed to support your business reduce cost, be more efficient and deliver your net-zero ambition.
